QUESTIONS OR CONCERNS? CALL US TOLL-FREE AT 1.866.341.2447 OR EMAIL US AT INFO@GETUNITRONIC.COM

1 . Open the engine compartment of the vehicle.

2. Remove the weather stripping on the rain tray

3. The rain tray is split into two sections. To complete the installation, the left side (Passenger Side) will need to be removed.
4. To remove the left side of the rain tray, carefully lift up the top left corner of the rain tray to unclip it from the windshield.

5. Locate the soundaktor in the middle of the cowl

6. Under the soundaktor, there is a 6-pin connector with a locking tab. This will be difficult to remove since the locking tab will need to be unlocked before the connector can be removed. To unlock the tab, it will need to be slid towards the right side of the vehicle (Driver Side). A 90 Degree pick can be used to unlock the tab.

7. With the 6-pin connector removed, locate the UH037-FL7 (Unitronic Feat Box Wiring Harness). This harness will have three Connectors.

**The connector circled in red will plug into the vehicle.

**The connector circled in Yellow will plug into the vehicle's 6-Pin connector that was removed in the step above

** The connector circled in blue will connect to the Unitronic UAF box.

8. With the feature box plugged in and securely mounted to the chassis using zip ties, reinstall the engine bay plastics in reverse order of removal

CONGRATULATIONS! You have successfully installed Unitronic's Feature Box.

Please follow [this link](#) to download the Unitronic UAF Control mobile application for Android or iOS devices. You will be prompted to create an account utilizing the email provided at the time of purchase. Once logged in, put the vehicle in accessory mode or start the engine to power up the Feature Box, in order for your phone to detect it via Bluetooth.
